

## CONTENTS

	<i>Page</i>
<b>Quantifying the benefits of spring cropping for control of <i>Alopecurus myosuroides</i> (black-grass)</b> S R MOSS & R HULL	1–6
<b>Optimising the cultural control of black-grass (<i>Alopecurus myosuroides</i>)</b> DICK NEALE	7–10
<b>A demonstration of the effects of winter wheat variety choice, seed rate and sowing date upon control of black-grass (<i>Alopecurus myosuroides</i>)</b> MATT WARD, DICK NEALE & COLIN BUTTON	11–14
<b>Use of different cultivation systems and herbicide programmes as a part of an integrated black-grass (<i>Alopecurus myosuroides</i>) control solution in winter wheat</b> S SHAH, C LLOYD, S CORBETT & J SOUTHGATE	15–23
<b>Is the increasing reliance on residual herbicides for <i>Alopecurus myosuroides</i> (black-grass) control sustainable?</b> R I HULL & S R MOSS	25–32
<b>Black-grass (<i>Alopecurus myosuroides</i>) control across a winter wheat/ winter oilseed rape rotation</b> D A ROBERTS & S A JACKSON	33–38
<b>Clethodim: its potential to combat herbicide-resistant <i>Alopecurus myosuroides</i> (black-grass)</b> S R MOSS, C RICHES & D STORMONTH	39–45
<b>Clethodim : Evaluation in field experiments for grass-weed control in oilseed rape</b> DAVID STORMONTH, STEPHEN MOSS & AURELIEN GUICHARD	47–51
<b>Can T1 and T2 spray applications control Fusarium Ear Blight?</b> P JENNINGS, G L THORP, S MCDONOUGH & A FLIND	53–60
<b>Wheat rusts: 2012 race update and implications for 2013</b> ROSEMARY BAYLES	61–66
<b><i>Cephalosporium gramineum</i> - an emerging threat to continuous cereal production</b> NEIL D HAVIS, FIONA J BURNETT & SIMON J P OXLEY	67–72
<b>Components for disease management decisions of <i>Sclerotinia sclerotiorum</i> in winter oilseed rape</b> F RITCHIE, P GLADDERS, C YOUNG, S WATERHOUSE & W REYER	73–78
<b>Nitrogen recommendations for UK cereal crops: the role of soil mineral nitrogen</b> J H ORSON	79–83
<b>Protein prediction in winter wheat</b> J G D MACKAY	85–90

<b>Plant growth regulators: their effect on yield of winter wheat in a very dry spring and in the absence of lodging</b>	
DAVE ROBINSON	91–94
	<i>Page</i>
<b>Evolution of knock-down resistance to pyrethroids in grain aphids (<i>Sitobion avenae</i>) in the UK</b>	
STEPHEN P FOSTER, DEEPAPALI WAL, JANET MARTIN & MARTIN S WILLIAMSON	95–96
<b>Saddle gall midge (<i>Haplodiplosis marginata</i>) in winter wheat</b>	
D A ROBERTS, D HARRIS, I CORR & W CORRIGAN	97–103
<b>The impact of changes to agronomic practice on farm yield trends in wheat</b>	
S KNIGHT, S KIGHTLEY, I BINGHAM, S HOAD, H PHILPOTT & B LANG	105–112
<b>Are agronomic practices favouring certain brome species?</b>	
SARAH COOK, RICHARD HULL, DENISE GINSBURG & STEPHEN MOSS	113–117
<b>Balancing fungicide performance on disease control and physiological benefits against resistance risks</b>	
W S CLARK	119–125
<b>Wheat disease risk forecasts by CropMonitor™: in-season updates and risk forecasts via the web and mobile devices</b>	
M C TAYLOR	127–133
<b>Retardation of winter barley leaf growth by alkaline materials: potential use in canopy management?</b>	
PETER S KETTLEWELL, ANNIS RICHARDSON & MICHAEL W S NELSON	135–136
<b>The impact of changes to agronomic practice on farm yield trends in oilseed rape</b>	
S P J KIGHTLEY, S M KNIGHT, I J BINGHAM, B LANG & H L PHILPOTT	137–144
<b>Oilseed rape: the impact of rotational intensity on crop performance</b>	
R M STOBART	145–150
<b>The effects of row width and plant population on the yield of oilseed rape</b>	
SARAH COOK, DENISE GINSBURG & PETE BERRY	151–156
<b>The Rothamsted Insect Survey: Old traps, new tricks</b>	
RICHARD HARRINGTON, MARK S TAYLOR, CHRIS R SHORTALL, LYNDA ALDERSON, MARK MALLOTT & PAUL J VERRIER	157–164
<b>Spray drift and buffer zones – a review</b>	
P C H MILLER	165–172
<b>Chlorpyrifos; efficacy of chlorpyrifos through air induction nozzles</b>	
DILWYN HARRIS & ANNE THOMPSON	173–176

*Posters*

<b>The use of polymer technology to improve manufactured nitrogen and phosphorus fertiliser efficiency and organic manure efficiency</b>	
A NOBLE, L MURPHY & C MURRAY	185–190
<b>An investigation into the development of monitoring and risk assessment systems for pollen beetles in winter oilseed rape</b>	
CAROLINE J NICHOLLS & SAMANTHA M COOK	191–196
<b>Sources of error in estimating the nitrogen content of autumn-sown oilseed rape (<i>Brassica napus</i> L.)</b>	
J CUSSANS, A BARNETT & T ROBINSON	197–202
<b>How interactions between phoma stem canker pathogens are influenced by fungicides</b>	
STEVEN J MOLONEY, YONG-JU HUANG, AVICE M HALL, MIKE ASHWORTH, PETER GLADDERS & BRUCE D L FITT	203–208
<b>Maturation of <i>Leptosphaeria maculans</i> and <i>L. biglobosa</i> pseudothecia and first appearance of phoma leaf spots on winter oilseed rape</b>	
SITI NORDAHLIAWATE M SIDIQUE, YONG-JU HUANG, AVICE M HALL & BRUCE D L FITT	209–215
<b>Severity of phoma leaf spotting and stem canker on <i>Brassica napus</i> cultivars with <i>Rlm7</i> resistance against <i>Leptosphaeria maculans</i> in the UK</b>	
GEORGIA K MITROUSIA, YONG-JU HUANG, AVICE M HALL & BRUCE D L FITT	217–222
<b>Weed ID APP – An APP to aid weed identification in the field</b>	
SARAH COOK, SARAH MOUNTFORD-SMITH & DENISE GINSBURG	223–224
<b>Integrated control of strawberry powdery mildew including the use of a prediction system</b>	
AVICE M HALL & KHIN HSU HSU SAN	225–228
<b>A study of the role of silicon in the control of strawberry powdery mildew (<i>Podosphaera aphanis</i>) in a field trial</b>	
K FATEMA, A HALL & D C NASEBY	229–234
<b>Development and maturation of the chasmothecia of <i>Podosphaera aphanis</i> on strawberry</b>	
XIAOLEI JIN, AVICE M HALL, YONGJU HUANG & BRUCE D L FITT	235–239
<b>Control of fruit rots and foliar diseases in soft fruit, using a new fungicide product based on fluopyram and trifloxystrobin</b>	
R H MEREDITH	241–248
<b>Fungal pathogens of yams (<i>Dioscorea rotundata</i> Poir.) during storage in Nigeria</b>	
T E SANGOYOMI, R ASIEDU & E J A EKPO	249–254
